

## Accessories/ Extras – especially for operating truck weighbridges

### Printer

#### Thermal Printer STB 80

- to use for printing on thermal paper roll:  
alphanumeric data, bar codes or visuals
- Flexible configuration of layout (corporate symbol, company name)
- 1,5 m printer cable included

**Price: 607,-- €**

#### Dot Matrix Printer LX 300

- dot-matrix printer, 9 pins,
- to use for printing on forms and lists on continuous paper and multiple sets with one original and up to 2 copies in DIN A4 format.

**Price: 409,-- €**

#### Dot Matrix Printer ML3390

- especially fast dot-matrix printer, 24 pins,
- to use for printing on forms, lists, labels, single sheet and continuous paper and multiple sets with one original and up to 4 copies in DIN A4 format.

**ML 3390-parallel: System printer** for connection to PC with Centronics-interface (3 m printer cable included)

**Price: 660,-- €**

**ML3390-seriell: Weighing printer** for connection to Pfister Waagen Bilanci weighing terminals EV 22 / DWT 410 / DWT 450 / DWT 800 (2 m printer cable included)

**Price: 793,-- €**

#### Laser Printer FS1030D

- up to 22 pages DIN A4/ per minute, print quality 1200 dpi
- paper capacity 300 sheets of paper
- parallel interface, 3 m printer cable included

**System printer** for connection to PC

**Price: 620,-- €**

#### Laser Printer B6300

- for high print volumes
- up to 34 pages DIN A4/ per minute, print quality 1200 dpi
- memory 128 MB (standard)
- serial interface, USB 2.0, bidirect. Centronics High Speed
- printer cable for connection to weighing indicators DWT 410, DWT 800 included

**Weighing printer**

**Price: 710,-- €**

Technical features please find in our sales information for printers

**Further printers on demand.**

## Driver Self-Service Terminals

Fully automatic weight recording,  
basic units for wall mounting  
Optional with low or high pillar

### Driver Self Terminal SELF 800

- Graphic display with numeric or alpha-numeric keyboard for user friendly dialogue
- Truck identification via bar code cards or optionally via magnetic cards
- Thermal printer for immediate document generation or when linked to an external weighing terminal printout via printer in the weighing cabinet/office.

Technical features please find in our product information no. 500

### Basic Unit with bar code reader and printer

Price: 4.756,-- €

### Only in connection with Winweigh Plus:

#### Driver Self Terminals in a Rittal closet

#### Operating Terminal ADLL

Price: 4.000,-- €

- For recording operator, start of the weighing procedure and printout of weighing data
- with mini traffic light (signal reports the finish of the weighing procedure)
- with printer and Legic reader

#### Operating Terminal ADLL

Price: 4.200,-- €

- Equipment same as Driver Terminal ADLL
- Additionally: Weighing terminal DWT 400 used as remote indication for showing the actual weight.

### High grade steel operation panels

- with lockable door, to be opened laterally
- with customised special equipment, for example with mini traffic light, intercom system, printer, card reader with numeric or alpha-numeric keyboard

Price from: 7.005,-- €

Further Self-Service Terminals on demand.

## Remote displays

### Remote display DFA 45 LCD

- 6-digit, numeric, 7 segment LCD display,
- black characters on yellow backlight
- day and night mode, perfect in direct sunlight
- digit height 45 mm

Price: 695,-- €

### Remote display DFA 67 - LED

- 6-digit, numeric, red illuminated  
7 segment LED display
- automatic intensity control
- serial interface (RS232 and RS485)
- digit height 67 mm
- reading distance up to approx. 25 m

Price: 695,-- €

### Remote display DFA 100 – LCD Transflective

- 6 digit, numeric, yellow reflective  
7-segment display with an active field  
for dimension symbol „g“, „kg“, „t“ and “lb“
- serial interface (RS232 and RS485)
- digit height 100 mm
- reading distance up to approx. 40 m
- Using transflective LCD-technique and  
background lighting, the display is  
clearly legible in the sunlight as well as  
in the dark.

Price: 1.585,-- €

Technical features please find in our sales information for remote displays.

**Further remote displays on demand.**

## PC's

### Full package with optimum efficiency for your business

All laptop and PC components are carefully harmonised. Operating system, driver and user software are installed and tested by Pfister Waagen Bilanciai GmbH

#### Budget Laptop

- Standardised laptop, especially for Pfister Waagen Bilanciai weighing software.
- applicable as a single user terminal for software program Winweigh Light or Winweigh Compact
- The laptop features a 2 years bring-in guarantee from the manufacturer.

**Price with Win XP Home™ included: 712,-- €**

Technical features please find in our product information no. 642

#### Budget Work Station PC

- Standardised PC, especially for Pfister Waagen Bilanciai weighing software
- applicable as a single user terminal for software program Winweigh Light
- The PC features a 2 years bring-in guarantee from the manufacturer.

**Price with WinXP Home™/ keyboard/ mouse (without monitor): 598,-- €**

Technical features please find in our product information no. 640

#### Premium Work Station PC

- Standardised brand PC, especially designed and optimised for Pfister Waagen Bilanciai weighing software with high data throughput .
- Applicable as a single user station PC or in a network with prepared remote maintenance for optimum software support.
- The PC features a 3 years „HP-Compaq guarantee“ (according to HP-Compaq Supplier Conditions)

**Price with WinXP™ / DVD-RW / keyboard/ mouse (without monitor): 995,-- €**

Technical features please find in our product information no. 641

**More PC types and equipment on demand**

## Traffic Control Systems

### Traffic Lights

- for wall mounting or mounting to a mast provided by the customer
- 2 signal lamps red/green, 200 mm Ø, with sun shield
- complete with bulbs 230V / 75 W
- H x W x D = 630 x 266 x 160/374,5 mm
- colour: pebble grey or black
- mounting parts included.

Price: 302,-- €

Complete with mast 3,2 m and foundation frame: Price: 767,-- €

### Traffic Light Control

- automatic control of traffic lights with weighing indicator DWT 410 / DWT 450 / DWT 800
- automatic signal for immediate unblocking to allow the vehicle to drive on after the weighing procedure.

Price: 470,-- €

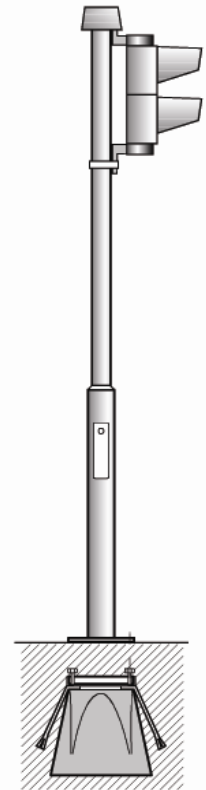

Further types of traffic light systems or traffic light control (manual or automatic operation) on demand.

### Barriers

- with manual control, duplex keys (open and close)
- Automatic control possible via weighing indicator DWT
- length of bars from 3m up to 5m

Price from 1.150,-- €

More types of barriers and automatic control systems on demand.

## Radio Remote

- for weighing indicator DWT 800
- 1 radio receiver with a fixed mini antenna with serial interface for connection to the interface of DWT800 or PC
- 1 radio handheld transmitter with 12 keys
- Range: 30 m
- 10 m data cable for receiver unit included
- 9V-battery for remote control included

**Complete price: 623,-- €**

**Additional Radio handheld transmitter: 228,-- €/ per unit**

Technical features please find in our sales information.

## Intercommunication Systems

For communication between the driver using the scale in the outer area and the weighing office.

### Hands free telephones BT20 for on site telephone system

- full-fledged hands-free telephone, connected to an on site telephone system like a standard telephone (with analogue connection).
- immediately ready for use

**Hands free telephone with 1 call button**  
for assembly in a driver terminal (rack type)

**Price 813,-- €**

**Hands free telephone with 1 call button**  
Built-in in a high grade steel housing for surface mounting with rain shelter (wall mounting)

**Price 966,-- €**

## Intercom Systems SPR

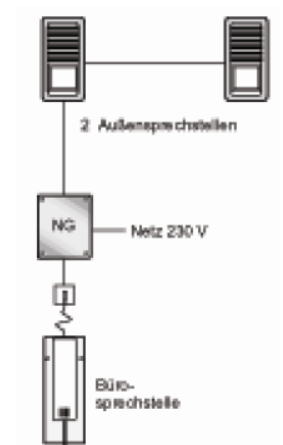

- simultaneously talking in both directions
- controlling of the intercom by button not necessary

**Intercom System SPR 11**  
for 1 intercom station in the office and  
1 in the outer area

**Price: 589,-- €**

**Intercom System SPR 12**  
for 1 intercom station in the office and  
2 stations in the  
outer area

**Price 928,-- €**

## Video Control

for remote monitoring of the correct position of the vehicle on the scale

### Standard Version:

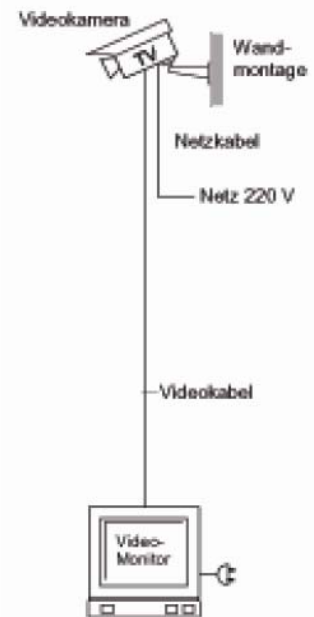

- Black/White camera in a weather proofed housing for suitable wall mounting
- Black/White monitor with screen 12"
- Cable and mounting parts as required.

### Video Control System (Standard)

Price 889,-- €

Technical features please find in our sales information.

More types of video control systems on demand.

## Card Reader

Card reader for connection to weighing software Winweigh / Winweigh Plus

- industrial proximity reader for transponder identification
- for PC-operation with Winweigh / Winweigh Plus

### LEGIC-Card Reader Bedanet 9120

Price: 1.710,-- €

- with display and keyboard (10 keys)
- for rack installation or wall mounting indoors/outdoors
- transmission of the card data or of the pin directly to the higher ranking system (Winweigh Plus) for checking and access control

### Proximity-Reader EM 22 Table

Price 600,-- €

- Proximity reader desktop unit
- without keyboard and display
- signal transducer: LED and beeper
- Connection to PC via E2M-Bus to the coupler unit EM20 CPU (PC interface RS 422 / RS 485)
- in plastic housing, protected against splash water

### Proxi-Reader EM4 / TN-E

Price: 1.200,-- €

- Proximity reader designed as a rack unit (into cabinet doors, etc.)
- non contact reading of proximity transponders
- reading distance max. 8 cm
- numeric keyboard with 12 mechanical membrane keys
- protected against splash water (frontally).

### Proxi-Reader EM4 / TN-WA

Price: 1.250,-- €

- Proximity reader designed for wall mounting protection class IP 65

### Proxi-Reader EM4 / TAN-E

Price: 1.585,-- €

- Proximity reader designed for rack installation (into cabinet doors, etc.)
- non contact reading of proximity transponders
- reading distance max. 8 cm
- alphanumeric keyboard with 47 mechanical membrane keys
- protected against splash water (frontally)

### Proxi-Reader EM4 / TAN-WA

Price: 1.700,--

- Proximity reader designed for wall mounting.  
Protection class IP 65

Reader Cards

### Barcode Card Reader SSR – 2210

- Industrial barcode card reader, particularly designed to be used with DWT 800, DWT 410 und DWT 450
- Barcode slot reader with integrated decoder (Red light)
- 1,5 m RS 232 connection cable with 9-pol. D-Sub plug included
- Particularly suited for reading different kinds of bar codes
- Power supply by wall power supply – included in the scope of supply.
- We recommend installing a mini traffic light to signal that weighing is executed.

More types of card readers on demand.

### Transponder

**Passive systems** are designed for max. reading distance of 20 up to 80 cm – depending on the system and size of the antenna. Large antennas with a surface of approx. 1 x 2 m are required.

**Active Systems** (with integrated battery) operating with a reading distance of up to 100 m – depending on type and kind of antenna. It is recommended to fix the tag on the outside of the vehicle.

The price, depending on the type, between 1.350,-- € and 4.500,-- €

All prices are ex works (Incoterms 2000), plus VAT.
